-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on 28 June 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: \_\_\_\_\_.

***Election/Restrictions***

Applicant's election with traverse of Group I in the reply filed on June 28, 2004 is acknowledged. The traversal is on the ground(s) that the method and apparatus are inimically associated. This is not found persuasive because in the article/apparatus claims, the food itself /its preparation is not positively claimed, like in the method claim; therefore, opening the article claims up to various supports in the art (which may or may not be specifically disclosed with food; simply being capable of being used in combination with food sufficing). Note: class 108 is a class for generic supports/tables while class 426 is specifically a food preparation class.

The requirement is still deemed proper and is therefore made FINAL.

Furthermore, claim 6 is withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. For claim 1, it is unclear what the scope of the claim is, i.e. whether or not the counter top is part of the invention along with the support accessory. The preamble of the claim is directed to only the support accessory

("support accessory cooperable with a counter top") while the body of the claim positively claims both the accessory and counter top ("said lower edge being in contact with a counter top surface").

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Palaith.

Palaith teaches a support accessory (7) cooperable with a counter top (20) comprising: a plurality of vertically oriented support members (14,12,28 and 36) and a support surface (10,24) mounted on the support members (portions thereof extending between respective support members). One of the support members (36) has a lower edge which extends downwardly beyond the lower edge of the adjacent support member and juxtaposed against a counter top edge. Two of the support members (14,28) form side walls about the periphery of the support surface. Furthermore, all of the support members include inwardly facing flanges (18 and 16 face inwardly toward each other and 42 and 40 face inwardly toward each other).
